

Uniserv Partner Program

Data Quality from the European market leader.

Uniserv is the largest specialized provider of data quality solutions in Europe. Data Management – the combination of data quality assurance and data integration – forms the core of our portfolio.

Uniserv provide businesses with effective solutions based on years of experience in data quality initiatives, data integration, data migration and consolidation, as well as data synchronization.

Having successfully delivered data quality and data management solutions to over 900 customers globally, we help companies improve their business processes. By maximising the success of their direct marketing campaigns and communication strategies, they succeed in better understanding and interacting with their customers. Uniserv software assists our customers in creating a consistent, reliable, and accurate master data asset, on which they base critical business decisions.

Our product portfolio is used in many different applications, such as CRM, e-business, direct and database marketing, CDI/MDM applications, data warehousing and business intelligence.

Uniserv software solutions can be integrated seamlessly into any business processes, any IT architecture and applications. They come with extensive customization possibilities and the best practice experience of our consultants and partners. We also offer individually tailored data management solutions to optimize business processes. This allows our customers to operate more successfully in the market.

At a glance: Strengths of Uniserv Software offer

- ▶ Integrated platform for data quality and data integration
- ▶ Comprehensive coverage of data quality functions
- ▶ Solutions for all aspects of the corporate data lifecycle
- ▶ Suite products
- ▶ Suitable for highest workloads
- ▶ Single record and batch processing
- ▶ On-premise and on-demand delivery modes

Because relationship matters.

Uniserv offers its data management software products worldwide. We aim for customer focus, reliable support and a permanent local presence and wish to build up, develop and maintain business relationships with our customers in the long-term. To expand national and international sales and to drive growth we are looking for committed partners who want to climb the ladder of success together.

Recruiting and maintaining relationships with pro-active partners by offering a powerful service package: that is the key ideal we are striving for at the heart of the Uniserv Partner Program. Let's all work together to create a mutually supporting partner ecosystem, to drive even greater value to customers as well as to fellow partners.

Why partnering with Uniserv?

- **To meet the Data Quality and Data Management requirements of your customers, together with a proven industry leader, with a history of delivery and expertise in the specialised DQ field.**

Meet customer requirements, maintain and enhance customer loyalty, and be a one-stop-shop for your customers.

- **To generate new business opportunities in a growing and dynamic market**

Data Quality and Data Integration are central to current hot topics (e.g. cloud applications, Big Data, 360° customer intelligence...) and are still essential to established topics like ERP, CRM, BI, and MDM – and the market keeps growing.

- **To strengthen and diversify your portfolio and skill sets**
Expand your offering to provide more choice and differentiation for customer and prospective projects, up-skill through Uniserv enablement, and increase your chances of project wins in competitive scenarios.

- **To drive new revenue streams and competitive bids**
Margin and preferential solution rates to partners.

- **To be a part of Uniserv's success**

Uniserv has been in the market for over 40 years. Its development and continual growth are based on a wide range of powerful software. The customer base includes top names from all industry sectors and many European countries.

"Thanks to the partnership with Uniserv, Capscan are able to offer our customers in the UK high-performance solution models, which can be individually customized. A large number of projects could only be implemented because of the efficient working relationship between Capscan and Uniserv."

DAVID MEAD, DIRECTOR PARTNER AND STRATEGIC RELATIONSHIPS (UK & US)
