

=====
Release & Version: webgateway 1.4.0.0
=====

This fix is only available for the following platforms:

- Windows 32 Bit Intel
- Windows 64 Bit Intel
- Linux 32 Bit Intel
- Linux 64 Bit Intel
- AIX53 32 Bit Intel
- AIX61 64 Bit Intel
- AIX72 64 Bit Intel
- Solaris10 64 Bit Sparc
- HP1123 64 Bit Itanium

Reason:

=====

Due to GDPR: http and TLS 1.0/1.1 are not supported anymore

The Webgateway supports only https encryption.

The parameter -e is for that reason no longer supported

Installation:

=====

In general: Stopping application - Replacement of files - Customize command line - Starting application

Please note: in older installations the directory structure may be different. In this case please use the existing directory structure.

- windows_x86_32 / windows_x86_64:

- uwebgate.exe ==> \$(UNISERV_HOME)/ConnectWeb/webgateway/bin/uwebgate.exe
- ca.cert ==> \$(UNISERV_HOME)/ConnectWeb/webgateway/bin/ca.cert
- remove "-e"-Option from the command line (check your registry entry)

- linux_x86_64 / linux_x86_32 / aix53_risc_32 / aix61_risc_64 / aix61_risc_72 / solaris10_sparc_64 / hp1123_itanium_64:

- uwebgate ==> \$UNISERV_HOME/ConnectWeb/webgateway/bin/uwebgate
- ca.cert ==> \$UNISERV_HOME/ConnectWeb/webgateway/bin/ca.cert
- remove "-e" from the command line (check your oestart.sh file)
