

readme\_webgateway\_1.3.0.0 (Windows x86 32).txt

=====

UPDATE: webgateway

16.04.2018

Release & Version: webgateway 1.3.0.0

=====

This update is only available for the following platforms:

- Windows 64 Bit Intel
- Windows 32 Bit Intel
- Linux 64 Bit Intel
- Linux 32 Bit Intel
- AIX53 32 Bit Intel
- AIX61 64 Bit Intel
- Solaris10 64 Bit Sparc
- HP1123 64 Bit Itanium

Reason:

=====

Due to GDPR: http and TLS 1.0/1.1 are not supported anymore

- The Webgateway version 1.3.0.0 only supports https encryption. The parameter `-e` is for that reason no used, or supported

Installation:

=====

- 1) Stop the application using the webgateway.
- 2) Stop the webgateway
  
- 3) Replace webgateway files with files from downloaded zip folder
  - 3a) windows\_x86\_32/webgateway/1.3.0.0-hf1/bin/uwebgate.exe ==>  
\$(UNISERV\_HOME)/ConnectWeb/webgateway/bin/uwebgate.exe
  - 3b) windows\_x86\_32/webgateway/1.3.0.0-hf1/bin/ca.cert ==>  
\$(UNISERV\_HOME)/ConnectWeb/webgateway/bin/ca.cert
  
- 4) Customize command line
  - 4a) remove "-e" from the command line (check your oestart.sh file)
  
- 5) Restart the webgateway
- 6) Restart the application

Please note: in older installations the directory structure may be different. In this case please use the existing directory structure.
